Samuel Cobas Ortiz

Web Developer

Driven career changer transitioning from hospitality to web development, combining a Computer Science background with hands-on full-stack experience in HTML, CSS, JavaScript, React, Node.js, Express, and SQL. Currently expanding expertise by learning advanced frameworks like Next.js and NestJS, as well as NoSQL databases such as MongoDB, to build scalable, modern web applications.

WORK EXPERIENCE

Frontend Developer
Wipass

09/2025 - Present *Hybrid, Spain*

Technologies

- Refactored and optimized existing ReactJS/Next.js components, improving code quality, performance, and scalability.
- Developed new features and responsive user interfaces using JavaScript, TailwindCSS, and Figma, following UI/UX and accessibility guidelines.
- Integrated REST APIs to enhance data communication and deliver a smoother user experience.
- Learned and applied Agile (Scrum/Kanban) methodologies, improving teamwork, communication, and development workflow with Git branching strategy ensuring clean, maintainable and collaborative development.

Assistant Bar Manager, Head Bartender
E&O, Ivy Collection, Soho House, Wright Brothers, Casa Marieta and Txots

05/2017 - 09/2025 *London, United Kingdom*

EDUCATION

Web development
Hack A Boss

11/2024 - 03/2025 *Spain*

Achievements/Tasks

- Developed responsive and dynamic web applications using JavaScript, TypeScript, React, and Vite, applying component-based architecture and modern UI practices.
- Designed and implemented RESTful APIs and back-end logic using Node.js with Express, following clean code principles and scalable structures.
- Modeled and managed relational databases with MySQL, designing efficient ER models and writing optimized SQL queries.
- Conducted debugging, root cause analysis, and API testing using tools like Postman to ensure stability and performance.

Bachelor of Science - Computer Science
London South Bank University

06/2020 - 08/2023

TECH STACK

Linux
Bash
Node.js
CI/CD
JavaScript ES6
MySQL
React
Express
GIT
REST API
Scrum
Postman
MongoDB
Typescript
Script
SOLID
Nextjs

TECHNICAL PROJECTS

Worked on several team-based and individual projects showcasing both front-end and back-end development, as well as immersive technologies.

- **Key Responsibilities:** Led the development of a VR campus tour application using JavaScript, Python, and WebXR. Collaborated in Agile/Scrum teams of 3–5 people, using Git and GitHub for version control. Developed RESTful APIs and front-end interfaces using JavaScript, React, Node.js, Express, and SQL.
- **Technical Skills Demonstrated:** JavaScript - React - Node.js - Express - SQL - API integration - WebXR - Python - Git - Agile/Scrum - Front-end UI - Back-end logic.
- **Outcome:** Successfully delivered three working applications: A Pokémon search app (JS front-end & API integration) A full-stack housing rental platform with user roles & reviews An immersive VR tour deployed as part of a university showcase.
